

Badge Generator

Let Partners create the accreditation badges that they deserve

Give partners the freedom to personalise the accreditation badges that they have earned, in-line with your branding without the need for approvals. Whether varying by language, colour, layout or size, partners can dynamically create the badge that best suits their promotional requirements.

Badge Generator's seamless integration with your Single Sign On environment, means that even if your partner programme spans multiple countries, languages and tiers, it will only let partners change the elements that they are intitled to.
